

JOINT SEMINAR

HIAS Brown Bag Seminar #28

/ The 85th HIAS Health Regular Seminar

Engaging Men and Boys in

SRHR

Sexual and
Reproductive
Health and
Rights

& **Gender Equality**

Why and How?

Investing in programming and policies to enhance SRHR of women and girls – in areas such as access to family planning, reducing child marriage and preventing violence is well understood. Less well researched, however, is the roles of men and boys.

In this seminar, Prof. Lohan will report on her research conducted for the WHO examining why this is important and what is the status of the global research. She will also report on how SRHR programming can be implemented with men and boys, including the Jack trial – the largest randomised trial of school sex education to-date and the first to test boys' engagement.
